CARRUTHERS DRUGS

PET AND VET SUPPLIES (Opposite Fee Motors)

Watch your cattle eat round baled hay, packaged exclusively by ROTO-BALER. You can tell immediately how well they like the better quality, cured in round bales.

Examine one closely and see why. The hay is fluffer with more nutrition-packed leaves rolled inside. Livestock eat it readily right from the bale, saving labor.

And it costs less to bale, too. It's wrapped with inexpensive binder twine — field travel is reduced by picking up big double windrows. Get ready now. Hay time will soon be here.

Some Thoughts About Brightening Up

The "Welcome Mat" For Farmers

It takes **TCP** to get the full power from High Octane Gasoline

Cars being made today are the most power-ful ever built. And with this extra power you also get extra economy—more miles per

gullon. The reason for these benefits is that today's engines are high compression engines and make more complete use of the power available in today's higher octuse gasolines. But did you know that the kind of driving most people do most of the time—ford driving most people do most of the time—ford driving complete to the continuous time. The continuous time creates a condition that engines should get from high octune gasoline.

Many Decayant pick high of driving increases.

Why? Because this kind of driving increases the build-up of certain combustion chamber deposits—the root of most power and gasoline waste. And to overcome these deposits you need a gasoline with a special kind of additive.

pistons reach proper firing position. This is called pre-firing and means that power works against you instead of for you.

In addition, these same deposits have another sower-wasting effect: They foul spark plugs, ausing your engine to miss.

Engineers will tell you there's nothing more wasteful of power and gasoline than pre-firing and spark plug "miss."

But there is an answer-there's one high octane gasoline that gives you all the advantages of high octane without the power-cripping effects of these deposits—Shell Premium Gas line with TCP*.

TCP, the Shell-developed additive, firepro

Start getting the full power built into your engine. Get Shell Premium with TCP. It's the most powerful gasoline your car can use!

SPECIAL NOTICE TO FARMERS

The business known as LINDSAY FLOUR & FEED, established at 2 Queen Street in Lindsay and solely owned and operated since 1943 by E. R. WRIGHT is changing ownership.

This thriving business is being purchased for the farmers of this district by THE UNITED CO-OPERATIVES OF ONTARIO, and the transfer of ownership will take place as of July 1st. 1955.

I wish to extend my sincere thanks to all those friends and customers who have used our services, and to whose loyalty we owe so much of our success. I feel that this change of ownership from myself to those who already do business here will be of great benefit to all, and especially to the farmers of the Lindsay area.

Thank you all once again for your valued and loyal sup-port, and we welcome the efforts of the United Co-operatives of Ontario in making this YOUR business.

LINDSAY FLOUR & FEED

The business operated by Mr. Ernest Wright known as LINDSAY FLOUR & FEED has been purchosed by THE UNITED CO-OPERATIVES OF ONTARIO, which is owned and controlled by 50,000 Onto 15 farmers through their 150 local co-operatives.

The United Co-operatives of Ontario will be inviting the farmers of the area surrounding Lindsay to form a local co-operative through which they will participate in the ownership and earnings of the above

Transfer of ownership is planned for July 4, 1955. It is intended to continue major lines handled at pent with the addition of CO-OP BD 1105

THINK

OW valuable is your driver's licence? Does your job or business depend on it? Do you really need to drive? Does that vacation you are planning include the operation of your car?

THINK Don't take your licence for granted. The operation of a motor car of motor truck is a privilege which can be suspended.

REMEMBER Your driver's licence will be suspended if you are convicted of a criminal offence or of any offence arising out of an accident. 21,000 licences were suspended in 1954. Many of those whose licences were suspended lost their jobs-others had to find a new line of business. What would YOU do without a driver's licence?

THINK and keep your licence.

To: The People of Victoria and Haliburton

May I take this opportunity of thanking May I take this opportunity of thanking those who worked for me and supported mo on Election Day. To me the most outstanding pleasure in the election which so positively endorsed the Government, was the endorsalton which I received from my own friends and neighbours in Victoria and Hallburton County.

At this time I would like to thank the people for the confidence they have shown in me over several elections which has been heartening and helpful in the great task which has been undertaken for our Counties and our people in Ontario.

I again thank you all for the endoraation you have given me. My every effort will be to serve the best interests of our people.

Very sincerely.

EASY TERMS

FRED SMITH APPLIANCES

The Greater the need for High Octane The Greater the need for TCP

Today's engines deliver more power than ever before-and with greater economy, too

They're high compression engines. They're built to squeeze more power out of every drop of the high octane gasolines they require.

But high octane alone will not keep these But high octane alone will not keep these engines delivering their full power. They must be protected against the harmful effects of deposits that build up in combustion chambers.

The reason is this:

The reason is this:

When your engine warms up, these deposits
warm up, too—glow red hot. And these glowing particles act like hot couls—inguite the
gasoline mixture ahead of time . . before the
pistons reach proper firing position. This is
called pre-firing and means that power works
against you instead of for you.

power-wasting effect: They foul spark plugs, causing your engine to miss.

Engineers will tell you there's nothing more wasteful of power and gasoline than pre-firing and spark plug "miss."

But there is an answer—there's one high octane gasoline that gives you all the advantages of high octane without the power-crippling effects of these deposits—Shell Premium Gasoline with TCP*.

TCP, the Shell-developed additive, fire-TCP, the Shell-developed additive, fire-proof the deposits to that they no longer cause pre-fring. No longer can they glow acd to the and ignite the gasoline mixture. And TCP' atops spark play "mixs," too. Your spark plugs do the job they are supposed to do. Sart getting the full power ball into your engine. Get Shell Premium with TCP. It's the most powerful gestionline your care can use! "when you they will be the strength of the strength of school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the strength of the school to the strength of the school to the school to the school to the strength of the school to the school t

Only Shell Premium Gasoline has both TCP and High Octane!

? ?? THE 5 MOST ASKED QUESTIONS ABOUT...

Is it true that lightning never strikes twice in the same place?

Untrue! It is rare for lightning to strike Untrue! It is rare for lightning to strike say, a house or a particular tree twice but if an object is high enough to form a perfect target it will be struck many times. An example is the Empire State Building in New York which has been struck as often as mine times in twenty minutes and which is regularly struck hundreds of times a year.

Does lightning sour milk?

No, this belief sprang up in the days No, this belief sprang up in the days before electric refrigerators came into general use. What does happen is that milk sours quickly in exactly the same kind of weather conditions that ac-company electrical storms. In other words if it is hot and humid the milk will sour anyway and a thunderstorm is a good possibility.

Is it unsafe to stand near an open w or door during a storm?

Lightning always strikes the highest point of a house so you are as safe in

of standing near a fireplace. The lightof standing lead a Inspace. The significant ming may strike the chimney and be conducted down the flue by the layer of soot. At the bottom it will quite likely jump into the room and strike you if you are in the way.

Is it safe to be in a car during a

A car is just about the safest place imaginable. An electrical current will pass around the outside of any metal shell. So the charge will be conducted well away from the passengers and leap to the ground safely. For the same reason you are quite safe in a modern all-metal aircraft.

Do animals attract lightning?

Do animals affrect lightnings:

The belief that they do comes from the habits of domestic animals rather than the characteristics of lightning. During a storm cows will cluster under trees or bunch together in the pasture and form the highest point in the field. Either way they might be struck. Or they will sometimes gather around a gate and lightning which has struck the dightning which has struck the did not the wire until it reaches the cows.

New Magic Telephone Brain Speeds Your Long Distance Calls

Machine that "thinks" helps operators complete cross-country calls in a matter of seconds

Long Distance calls is now in operation, bringing you faster, clearer Long Distance service.

This huge electronic robot masterminds in split seconds the orderly routing of Long Distance calls to centres all over the continent. It enables your operator to connect you directly to any of fifty million telephones just about as quickly as you dial local calls. Located in Toronto, it serves many communities in Ontario and Ouebec. Already we're planning the next big step in improving your Long Distance service when y be able to dial your own Long Distance calls

These latest developments are in line with our continuing policy of bringing you the

LONG DISTANCE CALLING

THE OLD WAY

THE NEW WAY

Electronically-controlled switches go into action in-stantly, search out the fastest, most direct route and ring the telephone in less time than it takes to read this explanation. It's almost like magic!

SAVE TIME ... CALL BY NUMBER

With "operator distance dialing", it's more important than ever to keep a list of out-of-town numbers you're likely to call. If you can give the operator the number you want, she won't have to call information in the distant city. Your call will go through in about half the time.

CANADA POST OFFICE

Watch your cattle eat round baled hay, packaged exclusively by ROTO-BALER. You can tell immediately how well they like the better quality, cured in round bales.

Examine one closely and see why. The hay is fluffer with more nutrition-packed leaves rolled inside. Livestock eat it readily right from the bale, saving labor.

And it costs less to bale, too. It's wrapped with inexpensive binder twine — field travel is reduced by picking up big double windrows. Get ready now. Hay time will soon

WEDDING

Why only *TCP* gets the full power from High Octane Gasoline

You might expect that all you need to get the full power out of a high compression engine is high octane gasoline. Actually you need more than just high octane-you need a gasoline with a special kind of additive.

That's because the way most of us drive most of the time-short trips here and there-creates a power-wasting problem that neither engine design nor highest octane gasoline can solve by themselves.

This problem is the increased build-up of certain deposits within the combustion chambers...the principal cause of power waste,

What happens is this:

As your engine warms up, these deposits warm up, too-glow red hot. And these glowing particles act like hot coals—ignite the gasoline mixture ahead of time . . . before the pistons reach proper firing position. This is called pre-firing and means that power works against you instead

In addition, these same deposits have another power-wasting effect; They foul spark plugs, causing your engine to miss.

Engineers will tell you there's nothing more wasteful of power and gasoline than pre-firing and spark plug "miss."

high octane gasoline that gives you all the advantages of high octane without the power-crippling effects of these deposits—Shell Premium Gasoline with TCP*.

TCP, the Shell-developed additive, fireproofs the deposits so that they no longer cause pre-firing. No longer can they glow red hot and ignite the gasoline mixture. And TCP stops spark plug "miss," too. Your spark plugs do the job they are sup-

Start getting the full power built into your engine. Get Shell Premium with TCP. It's the most powerful gasoline your car can use!

Shell's Trademark for this unique gasoline additive developed by Shell Research. Patent applied for.

Only Shell Premium Gasoline has both TCP and High Octane!

from neighbouring Headingly. Hutterites, an offshoot

sect. All clothing for community members is made by women, who work in the fields and gardens, care for the colony's children in a communal pursery, Women have no voice in colony.

photography is not usually permitted.

Hutterite Colony

throughout their 423-year instory, rengious persecution inal dogged the locateges of the Hutterian Brethern; at one time or unother they have been forced to flee from Moravia, Hungary Turkey and Russia in their search for sanctuary in which carry on the peaceful teachings of their Swiss founder, Jacob

Today, with this behind them, Hutterite colonies are flourishing throughout Manitoba, Alberta and the northwestern states of

Typical of the Hutterite colonies established in the New World is the one near Headingly, Manitoba. Its members practice the old apostolic order of "all things in common"; no individual is allowed to own private property and the profils from the extensive community farm are shared equally by Headingly's 150

memors.

Each male member is elected to a specific life-time job, counseled by two ministers and a steward. Though radios and movies are frowned upon, male members of the colony employ up-to-date power machinery on the colony's 4,000 acres.

due power machinery on the colony's 4,000 section. Because of a limit of 100 people per sterelment, fimilies are consumity outgrowing their colonies. When this happen, replicating the training the constraint of the colonies of the coloni

Each member of a Hutterite colony is elected to a specific life-time job. Colony's farm holdings are extensive Headingly group has over 130 head of cattle, 1500 pigs, 5,000 chickens. Here a group of Hutterite women are working in colony's garden.

Surgeon Creek miniter, Reverred Samuel Kleinauser (Jeft) is thown talking to elected Farm Boss Paul Menedel. Each colony has two minitors and a neuror whom excleened on care low the minimal and material welfare of the Brethren in the community. terites are granted immunity from military service.
